**Air quality: Pollution sources and impacts, EU legislation and international agreements**  
10-07-2018

Outdoor air pollution is caused by the emission of harmful substances from natural sources and human activities. It has a number of adverse effects on human health and the environment, and subsequently on society and the economy. Air pollution can be transported or formed over long distances and can affect large areas. Effective air quality policies require action and cooperation beyond the local and national levels, on a European and global scale. This publication presents key air pollutants, lists ...

**Air and noise pollution**  
01-02-2018

Air pollution and excessive noise harm our health and our environment. Air pollution mainly stems from industry, transport, energy production and agriculture. The EU air quality strategy aims to achieve full compliance with existing air quality legislation by 2020 and sets long-term objectives for 2030. The Environmental Noise Directive helps to identify noise levels in the EU and to take the necessary measures to reduce them to acceptable levels. Separate legislation regulates air and noise pollution ...
